

John Winko

Summary

Retired Navy Sailor looking to break into software development field. Back-end proficient while full-stack capable, keen aptitude for problem solving and proclivity for research.

Currently seeking opportunities working alongside an expert team of developers eventually progressing into performing more senior roles in the future.

Experience

Full Stack Developer - 07/2021 to Present

Freelance, Chicago/Milwaukee

- Created complete portfolio website with project pages highlighting skills with HTML, CSS, and JavaScript.
- Developed a tool in WinForms to assist with in-game interactions for Path of Exile.
- Currently developing a REST API for a sudoku solver. Features include random puzzle generation, step by step solutions and a front-end to see/solve a given puzzle.

Instructor (+other roles) - 12/2001 to 04/2022

United States Navy, Worldwide

- Directly supervised and mentored 395 Sailors across 12 duty assignments.
- Automated process for legal notice generation using a secured static database.
- Implemented a regional CMS for workflow tracking through SharePoint.
- Trained hundreds in basic networking skills, MS Office products and miscellaneous IT support.
- Trained over 11,000 Sailors in basic shipboard engineering across 98 topics.
- Tested over 90,000 Sailors at Basic Water Survival Skills in a high-risk training environment.

Education

Full-Stack Coding Bootcamp, Code Platoon (May 2022)

B.S. in Information Technology, Capella University
Summa Cum Laude with minor in Web Applications

A.A. in General Studies, Florida State College at Jacksonville
